

FRUIT AND VEGETABLE ART

CC.K-12.MP.6: Attend to precision

1.L.5c: Identify real-life connections between words and their use (e.g., note places at home that are cozy).

Your students are learning more about fruits and vegetables, but use this activity to help them create beautiful artwork to share with their families and help them learn more about fruits and vegetables!

Materials Needed:

- Cut out of a frying pan
- Paint
- Vegetables, specifically: potatoes, mushrooms, cauliflower, broccoli, carrots, peppers, apples
- Newspaper to cover the working space

Preparation:

- Gather the needed materials in an appropriate area.
- Place the chopped veggies on paper plates in front of the students.
- Set newspaper out on each desk to avoid the students getting paint on anything.
- Provide each student with a frying pan cut-out.
- Provide paper plates with paint on them for the students to dip the vegetables in.

Steps to Success:

1. Instruct the students to dip the vegetables lightly in the paint, and make stamps in the pan as if they were going to cook and eat them!
2. Remind students how well each flavor of vegetables compliments each other, which is why they are mixing them all together in a pan!
3. Instruct the students to let the paint dry, and put their names on the back of the pans so they can take them home and show them to their families!
4. Have students share with the class which vegetables they have tasted at home, and call on a few to explain how they tasted!
